

FIELDLINE HORSE FLOATS

FIELDLINE NEW ZEALAND'S NUMBER ONE TRAILER AND HORSE FLOAT MANUFACTURER:

There are 4 things to consider when choosing which horse float to buy.

The Frame & Chassis.

- The Fieldline frame & chassis is made in one piece from NZ steel.
- It is then fully hot dipped galvanized.
- This not only protects it from rust but makes the structure incredibly strong to suit our harsh NZ conditions; it will last for decades.

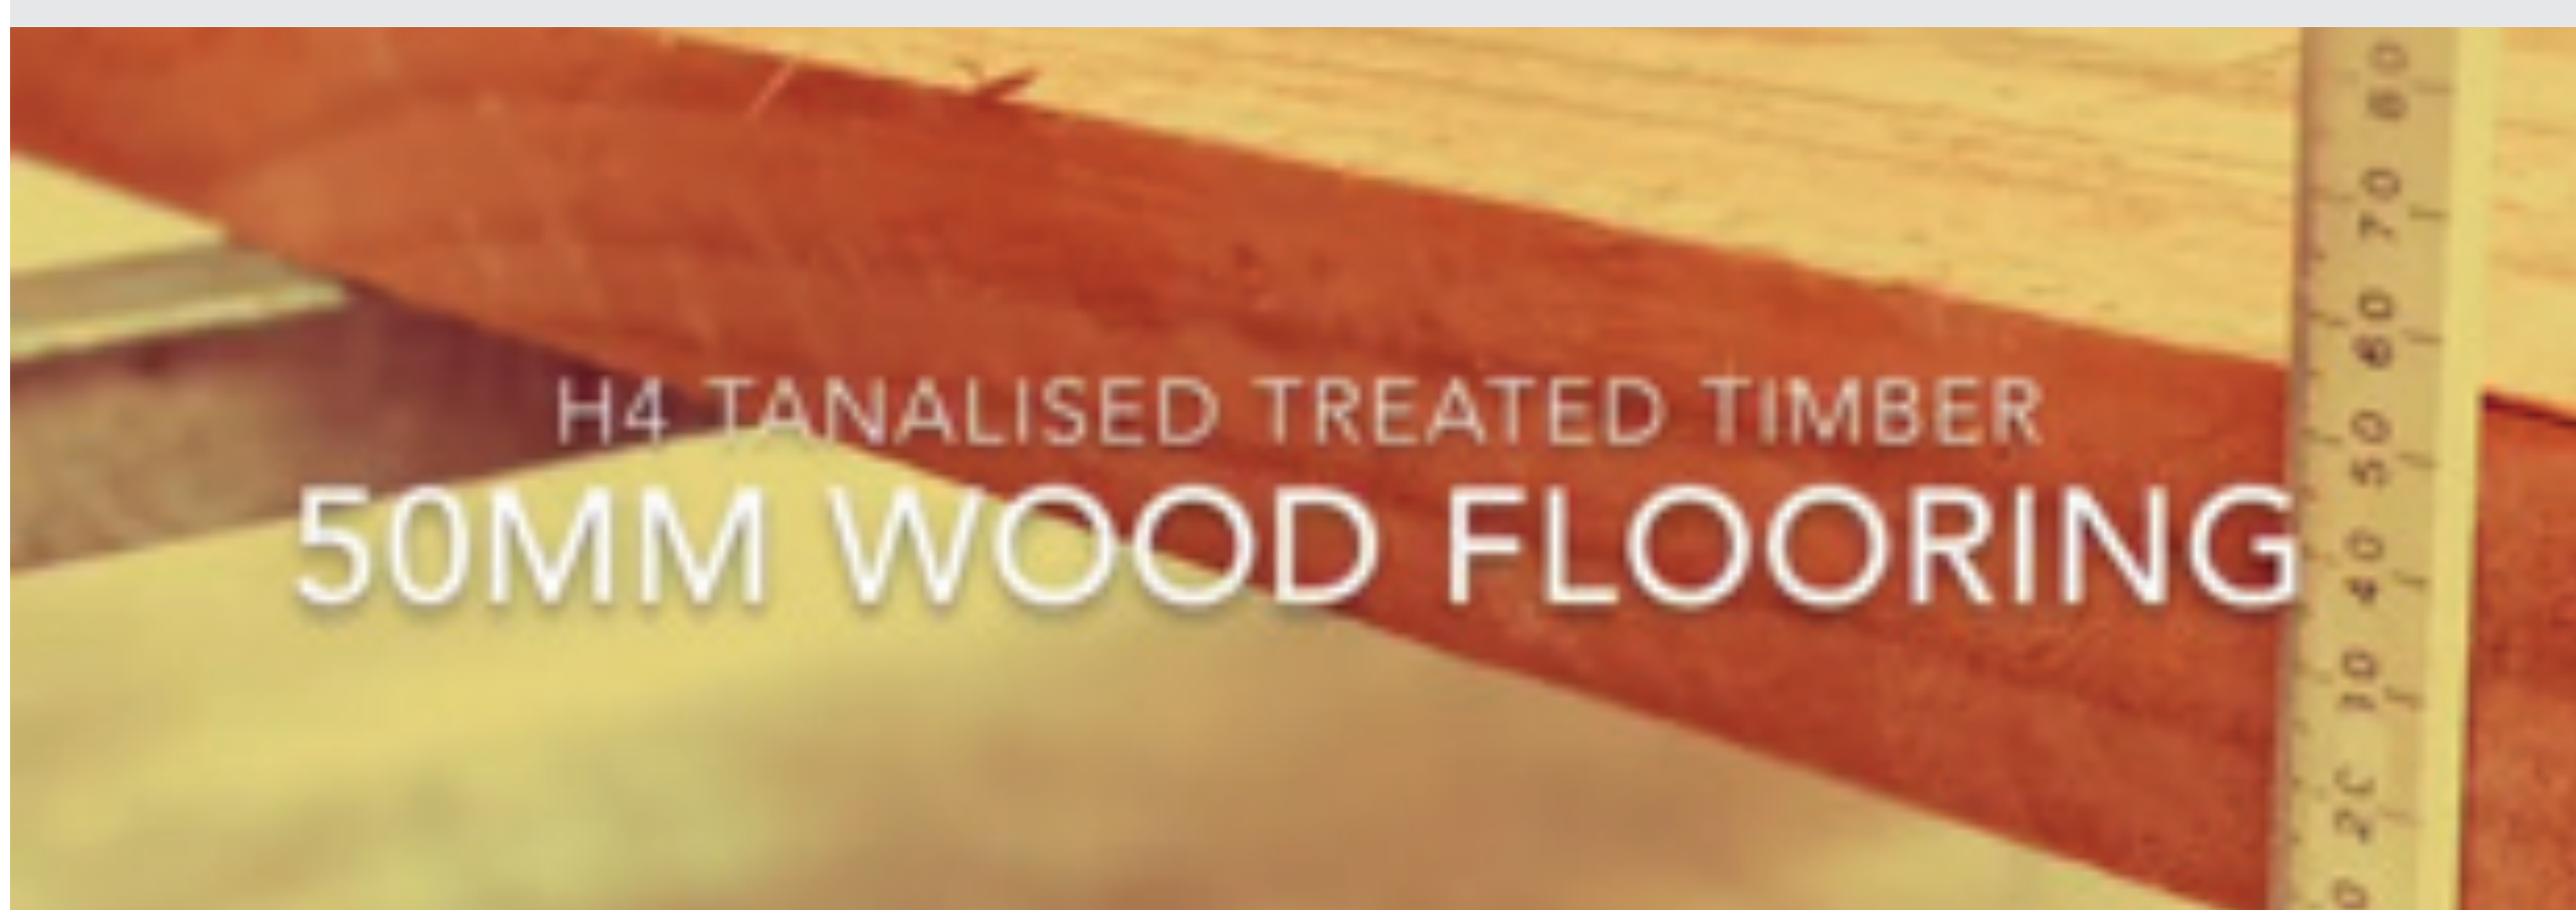

The Cladding.

- Fieldline use Colorsteel to clad the float.
- Fastened with a 3M sound deadening tape.
- Colorsteel is designed for New Zealand's roofs with a manufacturer's 25 year warranty.
- It is far superior to painted steel and much longer lasting.

The Floor.

- The Fieldline floor is 50mm thick H4 tanalised treated NZ timber
- It will not rot, flex, delaminate or transfer the heat and noise like plywood or aluminium.
- Your horse feels safe standing on such a solid floor that also gives the float a low centre of gravity making it tow extremely well.

**FIELDLINE
LIFE TIME
WARRANTY**

The Warranty.

- Fieldline give a lifetime warranty on the structure of the float from rust and rot.
- Fieldline floats retain their resale value because they are made to last and the lifetime warranty is transferable.

When you buy a Fieldline you buy quality and get peace of mind.
